

# Imaging Flow Cytometry Meeting

March 14<sup>th</sup> 2019 10:15 am-3:30 pm  
1252 - 204 Eduard Biermann (søauditorierne)  
Aarhus University

## Programme:

- |             |                                                                                                                                                        |
|-------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|
| 10.15-10.20 | Welcome, <i>Anja Bohn</i> , The FACS Core Facility, Aarhus University                                                                                  |
| 10.20-11:00 | Introduction to Imaging Flow Cytometry, <i>TBA</i> , Luminex                                                                                           |
| 11:00-11:15 | <b>Coffee break</b>                                                                                                                                    |
| 11:15-12.00 | Recent applications for Imaging Flow Cytometry , <i>Dr. Ziv Porat</i> , Weizmans Institute of Science, Israel                                          |
| 12.00-12.45 | <b>Lunch</b>                                                                                                                                           |
| 12.45-13.00 | Intracellular retention of C1-inhibitor in hereditary angioedema, <i>Didde Haslund, PhD</i> , Aarhus University                                        |
| 13.00-13:30 | Harnessing the Power of Imaging Flow Cytometers for Detection and Characterisation of Small Particles, <i>Jaco Botha, PhD</i> , Aalborg University     |
| 13.30-13.45 | CD46 activation induces distinct CXCL10 response in monocytes and monocyte-derived dendritic cells, <i>Aida Solhøj Hansen, PhD</i> , Aarhus University |
| 13.45-14.15 | <b>Coffee break</b>                                                                                                                                    |
| 14:15-14:30 | Characterizing Erythropoiesis in Human Bone Marrow with Imaging Flow Cytometry, <i>Mathias Hauerslev</i> , Aarhus University Hospital                  |
| 14.30-14.45 | The analysis of STING trafficking from ER to Golgi by Imagestream, <i>Baocun Zhang, PhD</i> , Aarhus University                                        |
| 14:45-15.00 | Titel to be announced, <i>Cecilia Hagert, PhD</i> , Aarhus University                                                                                  |
| 15:00-15.30 | Networking                                                                                                                                             |
