Self-Assembly and Molecular Electronics (SAME) is a multidisciplinary **peer-reviewed open access** journal covering the areas of molecular electronics, self assembly and Nanotechnology, with the aim to develop novel bottom - up approaches for the design and manufacturing of functional devices. SAME encourages original cross-disciplinary **full research articles, rapid communications** of important new scientific and technological findings and **state-of-the-art reviews**, as well as **methodological papers**.

Scope:

- Molecular Electronics and Molecular Devices with a particular emphasis on DNA, peptide and protein based systems
- Self Assembly in Nanoscience, Chemistry, Biology, Synthetic Biology and Medicine
- Supramolecular Chemistry
- Modelling of Structural and Electronic Properties of Organic Molecules and Self-Assembled Systems
- Atomic Force Microscopy and other scanning probe techniques
- Spectroscopic studies of nanostructures on surfaces and in solution including femtosecond and terahertz spectroscopy studies
- Studies of electron transfer, including electrochemical approaches
- Applications of nanostructures in bio-sensing and plasmonics

Editors-in-Chief:

Baoquan Ding, National Center for Nanoscience and Technology, China
Peter Fojan, Aalborg University, Denmark
Leonid Gurevich, Aalborg University, Denmark

Editorial Board

Luis A. Bagatolli, Inst. Inv. Médica Mercedes y Martín Ferreyra, Argentina
Giorgia Brancolini, CNR Institute of Nanoscience, Italy
Rosa Di Felice, Consiglio Nazionale delle Ricerche (C.N.R.), Italy
Wolfgang Fritzsche, Institute of Photonic Technology (IPHT), Germany
Alexander Kotlyar, Tel Aviv University Tel Aviv, Israel
Igor Nabiev, Université de Reims Champagne-Ardenne, France
Steen Brøndsted Nielsen, Aarhus University, Denmark
Danny Porath, The Hebrew University of Jerusalem, Israel
Rebecca Schulman, Johns Hopkins University, USA
Shalom J. Wind, Columbia University, USA
Félix Zamora, Universidad Autónoma de Madrid, Spain
